FIRST IN SERVICE

Thermal Oil

ODE/C

100 - 5000kW

Horizontal Cylindrical Diathermic oil heater with high quality mono or pluritubular helically wound tubes.

Equipped with big front door to facilitate easy maintenance operation.

The advantages in using the diathermic oil heaters are the following:

- High working temperatures (300°C max, 350°C on request)
- No scale or corrosion (typical of water systems)
- Optional temperature level set-points
- Low film temperature, ensures long life of the thermal fluid
- Low maintenance cost
- Clean and safe operation
- Low pressure system
- Low thermal fluid resistance
- Indirect hot water and steam generation options
- No water treatment requirements
- Suitable to work with gas, light oil or heavy oil.

On request can be supplied complete with oil supply unit (with 1 or 2 pumps), control board, hydraulic and electrical connection.
